

REPORT

Goal: 4. Quality Education

1. Access to educational resources for those not studying at the university

The Information Resource Center of the Tashkent State University of Economics was established in 1931, and today the Information Resource Center **has 5 educational and electronic halls** .

University Information -Resource Center includes **40,000** books and **220** thousand in copy literature.

In the information resource center **14** types of the following services are included:

Registration of readers; giving and receiving books; classroom service; use of press releases; use, search and presentation of electronic information resources; providing requested books through Telegram groups and channels; introduction to fiction; processing of newly received books; public service; service based on cooperation; book repair and quality storage service; converting printed literature into electronic form; presentation of newly accepted fiction; serving users with visual impairments; Placement of electronic books on ebook.tsue.uz portal.

There are a total of **77,988** users in the Information Resource Center, of which **58,645** are undergraduates, **3,488** are graduate students, **2,738** are doctoral students, **7,382** are professors, **832** are employees, and **560** are non-university users.

Information resource center of Tashkent State University of Economics is an inter-methodical center of higher and secondary educational institutions in the republic for economic literature. For this reason, visitors from abroad who are interested in economics are also served in the resource center.

The Information Resource Center is equipped with modern technical facilities, including **150** computers, **3** printers, **6** scanners, **2** copiers and **2** video projectors.

"TDIU-ARM" telegram channel was established in order to improve the efficiency of using electronic library resources and create convenience for students.

The Information Resource Center is carrying out the following activities to improve the electronic education system. Including:

to fully transfer the educational and scientific literature in the University library fund to electronic form and launch the single **"Electronic Library" platform under the ministry, and the following works are being carried out by the working group approved on the basis of this order:**

- Under the Ministry of Higher and Secondary Special Education, educational and scientific literature from "TDIU ARM" fund is being scanned and filled with electronic literature on the single **"Electronic Library" platform.**

Newly received literature is scanned and PDF versions are regularly placed on unilibrary.uz [platform and IRC telegram channels](#). Also, in 2021 and 2022, electronic forms of textbooks and training manuals published in **9000** copies in **265** titles by the university professors and teachers on the credit module are being placed on this platform and IRC Telegram channels.

The Information Resource Center of Tashkent State University of Economics has created another facility for professors and students. Now professors-teachers, researchers and students are supplied with copies of electronic literature based on orders through Telegram social network.
