

## REPORT

### Energy reviews to identify areas where energy wastage is highest

On August 26, 2022, an online dialogue was held between the **Young Entrepreneurs Generator business incubator** at Tashkent State University of Economics and the Indian wind energy provider **INOX Wind**, which has a capitalization of 121 billion.

During the online meeting, issues of cooperation were discussed in the field of wind turbine generators, WTG production, wind resource assessment, infrastructure development, installation and commissioning, long-term operation and maintenance of wind power projects.

During the negotiations, the representative of INOX Wind in Saudi Arabia, Abdullah Al-Dosar, made a proposal to attract investments from international financial institutions and international banks, if the amount of this project is higher than \$ 70 million, for projects of wind and solar power plants up to **\$ 70** million.

The director of the business incubator "Young Entrepreneurs Generator" Sardorkhan Buzrukkhonov expressed his views on the prospects for the implementation of bandying projects in the country. He provided information on the possibility of qualifying the most suitable projects by organizing a competition of projects and startups with the involvement of industry experts.

At the end of the meeting, due to the friendly and practical foreign policy pursued by **Uzbekistan** in the international arena in the following years, equally beneficial relations with foreign countries and international organizations were recognized.
